

Magnetization - Degaussing of machines, prototype parts, tools and magnets

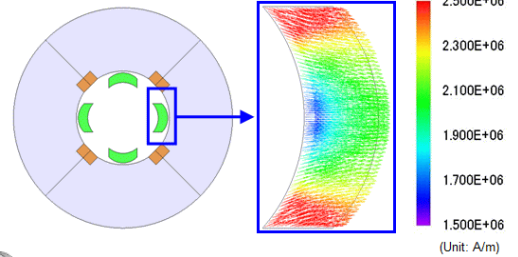

Magnetization of magnets and magnetic assemblies for validation of industrial prototyping

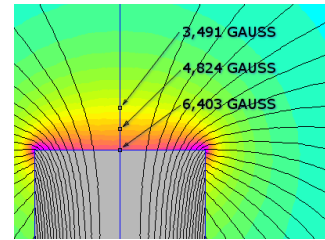

Magnetization / degaussing test laboratory

Any type of polarization

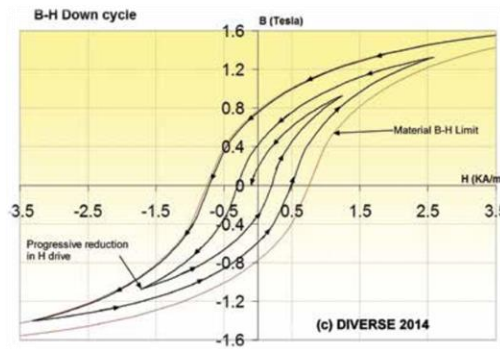

Modeling of magnets and magnetic assemblies

Very low frequency degaussing of massive parts or complex assemblies, small series parts

Complete degaussing of massive parts

Residual magnetic field less than 240 A/m after degaussing

Measuring tools for control of degaussing
